

ANINVER INFRAPPP PARTNERS, S.L. has assumed the commitment to implement and maintain a Quality and Environmental Management System based on the requirements of the ISO 9001 and ISO 14001 standards, for our **Strategic Consulting and Business Advice Services, and Development and management of digital knowledge platforms**

The Management of **ANINVER** defines this Policy as an integral part of its processes and facilities, guaranteeing the continuous improvement and efficiency of the system. and with a commitment in the pollution prevention that our services may cause, fulfilling all the legal and any of other requirements that the organization subscribes to.

The continuous improvement of the system can only be achieved through information, consultation and participation of the staff, at all levels of **ANINVER**.

In accordance with these principles, **ANINVER** assumes the following commitments:

- ❖ **Clients go first:** We seek the satisfaction of the requirements and expectations of our clients, helping them to make the best decisions, and increase and grow in today's competitive environment.
- ❖ **Innovation and excellence:** We are experts in technology and encourage the development of the private sector and technological transformation. We like to guarantee the best quality in the delivery of work following an analytical approach and recommendations based on knowledge.
- ❖ **Global:** We have an international mentality. We travel and work all over the world, getting closer to our customers.
- ❖ **Continuous improvement:** we perform systematic audits, both internal and external, that verify the compliance and effectiveness of our Management System. We challenge ourselves every day, by learning and improving incessantly.
- ❖ **Positive work environment:** we work in a collaborative and motivating place.
- ❖ **Alliances:** integration of our suppliers and subcontractors in the commitment to improve customer satisfaction and control of environmental aspects.
- ❖ **Protection of the Environment:** the prevention of pollution and the depletion of resources are incorporated in all activities related to the Environment, through the control and the minimization of the waste and consumption generation.
